

Quipp sells seven (7) Quipp Packman Packaging Systems to *The Ottawa Citizen* & an inserter expansion to *The Lubbock Avalanche-Journal*; installs mailroom at *The Chronicle-Telegram* in Elyria, Ohio & creates kit to upgrade electronic computer controls on existing Quipp Model 300 Stackers

Quipp is proud to announce the sale of seven (7) Quipp Packman Packaging Systems to *The Ottawa Citizen*, a CanWest Publications newspaper. The equipment will be installed in the next few months.

The Quipp PACKMAN Packaging System addresses the primary challenge inherent with Sunday inserted products: bundle quality. Containing the bundle through the entire process solves this issue, resulting in substantial labor savings.

Florida Today in Melbourne, Florida was the first newspaper to purchase two (2) Quipp Packman Packaging Systems, after testing a unit in 2003. Since then, many newspapers have purchased over seventy (70) Quipp Packman Systems to help them achieve their production goals, especially when handling their Sunday products.

The Quipp Packman is ideal to handle your big inserted packages.

To request a CD showing the Quipp Packman in operation at *Florida Today* in Melbourne, Florida, please e-mail us at news@quipp.com or call us at (305) 623-8700 ext 350.

The Lubbock Avalanche-Journal, a Morris Communications Newspaper, purchased from QUIPP an Inserter Expansion, consisting of four (4) new feeders to be installed on their existing inserters. Installation will take place in the Third Quarter in Lubbock, TX.

Recent Quipp Stacker Orders

- Greeley Daily Tribune, Greeley, CO – 500C (1) **Model 500C includes Bundle Compression Capability and Stream Squeeze Roller = ideal to handle thin products!**
- Sun-Journal, Lewiston, ME – 500W (1)
- Lexington Herald-Leader, Lexington, KY – 500N (1)
- The Advocate, Newark, OH – 500N (1)
- Anderson Independent-Mail, Anderson, SC – 500W (1)
- Journal Enquirer, Manchester, CT – 501N (2) with **Win 32 Stacker Programmer**

The QUIPP Win32 Stacker Programming System is a PC-based, manifest directed method of simultaneously controlling the output of up to four stackers producing variable (as well as standard) count bundles in predetermined size and sequence.

The ultimate objective of a Win32 System is to assure maximum count accuracy in the delivery of products to all circulation destinations - without manually counting or marking bundles during production.

For additional information and a demo CD of the Quipp Win 32 Stacker Programmer, please call us at (305) 623-8700 ext. 350 or e-mail us at news@quipp.com.

ATTENTION EXISTING QUIPP 300/301 STACKER OWNERS

UPGRADE YOUR OLD MODEL 300 STACKER ELECTRONIC CONTROLS WITH THE LATEST TECHNOLOGY AVAILABLE

Quipp has created a kit that will allow you to upgrade your 15 year old Model 300/301 Stacker Controls with the same control technology used in the Quipp Model 500 Stackers. Many of the components for the old stackers are obsolete, unavailable or very expensive. This upgrade kit will protect your investment and ensure your stackers availability for production.

The **300 ENHANCED ELECTRONIC CONTROL KIT** includes the following:

- 1) New LCD Color Touchscreen (see picture below right)
- 2) New Card Cage with integrated power supply and a 24 volt solid state power supply
- 3) New Control Boards (two I/O boards, one CPU board, one Stepper Drive Board and one Video Board)

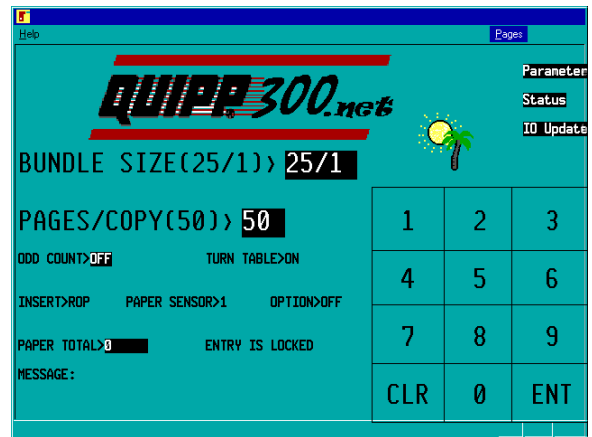

The above parts are the same currently being used in our Quipp Model 500 Stackers which will allow you to interchange them, reducing the numbers of spares you keep in inventory.

The **300 ENHANCED ELECTRONIC CONTROL KIT** will update your Model 300 Stacker to present Model 500 Stacker production standards for streaming communications* and discrete TMC operations. These operations are central to inserter control packages. * *Additional Hardware Required (Communication Card)*

The **300 ENHANCED ELECTRONIC CONTROL KIT** can be installed by experienced Quipp field service personnel.

Original 300 Stacker Screen

New 300 Enhanced Color Touchscreen

For additional information & pricing on the **300 ENHANCED ELECTRONIC CONTROL KIT**, please contact our Parts Department at (305) 623-8700 ext. 348 or ext. 339 or via e-mail at parts@quipp.com.

Quipp installs complete mailroom at *The Chronicle-Telegram* in Elyria, Ohio

In 2006, Quipp sold a complete turnkey mailroom project to *The Chronicle-Telegram* in Elyria, OH. The system is part of a new building expansion designed by Forum Architects of Cleveland, OH.

The project consists of a Quipp Twin-Trak Belt Conveyor System, two (2) Quipp-Newstec High-Speed Inserters (a 22:2 and a 10:2) delivering to three (3) Quipp Model 501 Stackers and associated tie-line and dock distribution equipment.
