

QUIPP SELLS MAILROOM SYSTEM TO *BLISS COMMUNICATIONS* IN JANESVILLE, WI, CONSISTING OF GRIPPER AND BELT CONVEYORS, TWO (2) QUIPP PACKMAN SYSTEMS, TWO (2) QUIPP MODEL 500 WIDE STACKERS AND A COMPLETE BUNDLE DISTRIBUTION SYSTEM, ANNOUNCES OTHER RECENT SALES & AGAIN, RECEIVES GREAT REVIEWS FROM HAPPY QUIPP CUSTOMERS

Bliss Communications in Janesville, WI has purchased a new Press Belt and Gripper System from Quipp along with a complete Bundle Distribution System which includes two (2) Quipp Packman Packaging Systems with Prism Ink Jet Printers. Both of these systems will be installed and operational during the third quarter of 2007.

**The Janesville Gazette/ Bliss Communications
Janesville, WI**

The high speed press lines will deliver ROP products to two (2) Quipp Model 500 Wide Stackers, one of which will deliver the stacked product directly to a hopper loader to feed the main jacket head of the inserter. The press conveyor system includes waste and paste detect capabilities for both the belt and gripper lines as well as net count reports back to the press controls.

The Bundle Distribution System includes two (2) tielines featuring a Quipp Packman Packaging System at each. Both Quipp Packman Systems will have the capacity to odd count each bundle as well as to ink jet the bottom wrap prior to receiving a strap. Each tieline will feed bundles onto a series of mattetop cross-conveyors which can deliver the bundles to any of the seven truckloader positions. The bundles are to be routed to the truckloaders manually using a bundle counting system located on each tieline as provided by Quipp.

Some of our Happy Customers! American Color Graphics, Dayton, NJ

Matthew Allen
Plant Manager, Dayton, NJ - American Color Graphics

"Right now we are dealing $\frac{3}{4}$ of a million pieces and typically we run them at 19,200 net pieces/hour in each of our two (2) Quipp High-Speed Inserters. Our Quipp Inserters are flexible and reliable, and these were some of the main reasons why we purchased them. Our Quipp inserters can run inserts that are very small to very large. We like the flexibility and reliability of the machines. Some of the main benefits of our Quipp inserters are:

- 1) We finish faster
- 2) Labor costs are less
- 3) Final product looks really good, which makes our customers very happy.

The service we have received from Quipp has been terrific and since we made the decision to buy the inserters from Quipp, they have been behind us 100%.

We wouldn't be as successful as we are right now without our Quipp equipment.

For anyone that is in the market looking for inserters, Quipp needs to be a serious consideration".

Matthew Allen
Plant Manager, Dayton, NJ
American Color Graphics

Quipp installed a 16:2 Quipp-Newstec High Speed Inserter and a Quipp Model 500 Stacker in the American Color Graphics plant in Medina, Ohio at the beginning of 2006 and they liked it so much that a few months later American Color Graphics ordered a 16:2 and a 12:2 Quipp-Newstec High Speed Inserters as well as two Model 500 Quipp Stackers and two Quipp Vipers for their Dayton, New Jersey plant.
