

Quipp sells *Quipp-Gripp III Single-Gripper Conveyor* to the *Longview News-Journal (TX)*, Announces Recent Orders & Creates New Safety Kits for Existing Stacker Owners

Quipp will exhibit the **Quipp-Gripp III Single-Gripper Conveyor System** at **NEXPO 2005** in Dallas.

The **Quipp-Gripp III Single-Gripper Conveyor System** is a versatile, high quality, positive control conveyor developed especially for newspaper production systems.

Versatile, flexible, accurate and affordable, the **Quipp-Gripp III Single-Gripper Conveyor System** is a cost effective solution to many of the complex problems confronting today's newspaper packaging centers.

Newspapers that want to:

- Run presses at higher speeds
- Count products accurately
- Insert on-line
- Split streams easily
- Deliver to multiple destinations
- Gain maximum use of existing floor space
- Minimize storage requirements
- Keep products moving
- Preserve product quality
- Reduce material handling

are ideal candidates for **Quipp-Gripp III Single-Gripper Conveyor Systems**.

For additional information, please contact us at news@quipp.com or at (305) 623-8700 ext. 350.

The *Longview News-Journal* purchased the new **Quipp-Gripp III Single-Gripper Conveyor System** to install off their existing **DGM folders**.

The **Quipp-Gripp III** will allow the *Longview News-Journal* to produce higher quality products by eliminating their existing vertical belt conveyor, which now causes offset markings on the product.

Two (2) lines of the Quipp-Gripp III will deliver products from the paper's existing folder deliveries to existing horizontal conveyors, which will transport to their existing stack positions.

Installation to commence early this summer.

The *Longview News-Journal* has a circulation of close to 30,000 on weekdays and close to 40,000 on Sundays and it is owned by Cox Newspapers.

Going to NEXPO?

Make sure to visit our
booth # 2903 at NEXPO 2005 in Dallas.

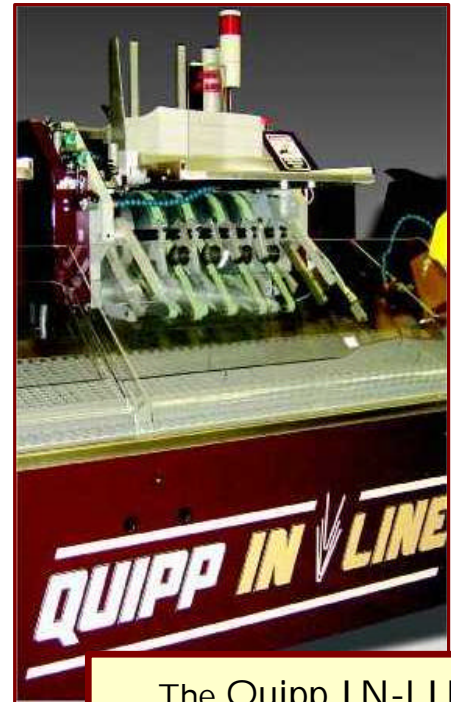

We will also be exhibiting the:

- **Quipp IN-LINE Inserter (Head)**
- **Quipp PACKMAN Packaging System**
- **Quipp Model 500 Stacker**
- **Quipp Viper Bottomwrapper**
- **Quipp "Off-Press" Counter Stacker**

For existing Stacker Owners, we will be displaying the following kits to be installed on existing Quipp Stackers:

- **Quipp Light Curtain Safety Kit**
- **Quipp Pusher Spacers Kit**
- **Quipp Side Guide Adjustments Kit**
- **Quipp Mini-Electromechanical Kit**

The Quipp I N-LI NE
Inserting System
features patented head
technology that handles a
wide variety of insert sizes
with minimal set-up changes.

Side Guide Adjustment Kits are now available!

Applicable to all series of Quipp Stackers from the 35X thru 50X, the installation of the External Side Guides Adjustment kits will greatly enhance the safety and operation of existing Quipp stackers.

Note that direct access to the Side Guides is blocked. Yet the external adjustment knobs and the high visibility to the stacking area permit fine-tuning of the stacking action - especially during production.

Recently developed and now standard on all new Quipp 50X Series Newspaper Stackers, the Stack Forming Side Guides External Adjust feature has **added another level of safety to Quipp Stackers**. This feature is now available in kit form for application to the full range of your existing Quipp 35X, 40X and 50X Series stackers.

For additional information about this and other safety kits, please contact our Parts Departments at (305) 623-8700 ext. 339 or 348 or 1-800-258-1390.
