

Quipp sells two (2) Quipp PACKMAN to *The Cleveland Plain Dealer* , creates Pusher Spacers Kits for existing Quipp Stackers & offers Preventive Maintenance Program

The ***Cleveland Plain Dealer*** (a Newhouse newspaper) purchased two (2) Quipp PACKMAN Packaging Systems after a successful test in November 2004 at their Brooklyn, OH production facility.

The **Quipp PACKMAN Systems** will be installed to operate off of their existing GMA SLS-2000 inserter.

The ***Plain Dealer*** was looking for a reliable system to run at a high speed to create the large inserted products that would also maintain bundle integrity.

Quipp PACKMAN Packaging System

The integrity of bundles is maintained through the strapping process, ***resulting in bundles of the highest quality.*** Because the bundles are contained throughout the entire process, ***less handling is required.***

Quipp PACKMAN: Stack, Wrap, Print & Strap all in one fast, reliable operation

ATTENTION EXISTING QUIPP STACKER OWNERS

Are you running different newspaper sizes in your daily operation?

See valuable information about the new Pusher Spacers Kits on page 3.

GOING TO NEXPO?

Make sure to mark your calendar to attend the NEXPO tour at ***The Dallas Morning News*** to see the Quipp PACKMAN running production in their Plano facility.

The Tour is Sunday, March 20 from 5pm to 7pm.

Quipp Preventive Maintenance Program

Now that the “Holiday Season” is behind us, we want to make sure that your Quipp equipment will be running flawlessly in 2005.

This is the perfect time to perform PREVENTIVE MAINTENANCE.

Simply contact our Parts & Service Departments and they will gladly send you information about the Quipp Preventive Maintenance Program.

parts@quipp.com or service@quipp.com

This program could help you save time, money, headaches and stress in 2005.

Terence F. Augustyn (left) from *The New York Times* and Jurgen Kirschner, Quipp's Service Technician.

In December 2004, *The New York Times* contracted with Quipp to perform the ***Preventive Maintenance Analysis*** on all of the ***Quipp Stackers and Quipp Bottomwrappers*** in their College Point facility.

Running different newspaper sizes in your daily operation?

As part of our on-going commitment to you, Quipp has recently created **Pusher Spacers Kits** that can be installed on existing Quipp Stackers.

The Quipp Pusher Spacers provide great flexibility if you are running different paper sizes.

All new Quipp Model 500 Stackers will be equipped with this feature.

Quipp now offers Pusher Spacer Kits to be installed on existing Quipp Model 35X, 40X and 50X Newspaper Stackers. Once installed, the six permanently mounted pushers will accept the entire range of available spacers. Then, depending upon stacker model and spacer installed, product widths of from 10.5" to 16.5" can be effectively stacked.

Quipp Series 34213X Pusher Spacer Kits include one set of six pusher blades to be permanently mounted on the rotating turntable walls. A set of two mount fittings on each pusher blade then permit quick installation of the six sets of spacers correctly sized for the product to be stacked.

Spacers are available in 1/4" width increments from 1/2" to 2".

For additional information & pricing on the Pusher Spacers Kits, please contact our Parts Department today at 1-800-258-1390 or at parts@quipp.com.
