

QUIPP Stack Forming Side Guides - External Adjust Kit

Introduction

Recently developed and now standard on all new Quipp 50X Series Newspaper Stackers, the Stack Forming Side Guides External Adjust feature has added another level of safety to Quipp Stackers. This feature is *now available* in kit form for application to the full range of your existing Quipp 35X, 40X and 50X Series stackers.

As pictured, three adjustment knobs are now located clear of the stack forming area. They control both the placement and the angles of each Stack Forming Side Guide.

Previously, only when the stacker was shut down was it safe to adjust the Side Guides. Now, adjustments are made under safe conditions and advantageously even during production.

Note that direct access to the Side Guides is blocked. Yet the external adjustment knobs and the high visibility to the stacking area permit fine-tuning of the stacking action - especially during production.

The Kit

Each kit is designed for the specific model Quipp stacker designated. Necessary parts are included together with a pictorial instruction.

Some parts of the existing stacker are removed and exchanged for parts supplied with the kit.

The Design

Adjustment knobs involved in the new design are:

1. Top Knob

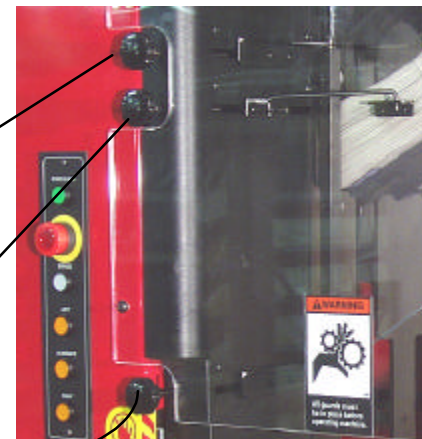

Adjusts upper Guide position to left or right.

2. Middle Knob

Adjusts Guide angle once its placement is set.

3. Bottom Knob

Adjusts lower Guide position to left or right.

ADDED SAFETY CONSIDERATION - - -

The heavy-duty plastic guard, which is part of the kit, protects the operator from the moving stacking section.

Features and Benefits

- **Side Guide adjustments now readily accessible** - three knobs now control placement and angle of the Side Guides.
- **Guide adjustments now perfectly safe** - a heavy-duty plastic guard is firmly mounted between stacking Section and the operator.
- **Fine screw adjustments on both placement and angle** - assure precise positioning of the Side Guides.
- **Stack Quality improved** - It is possible to bring the guides in closer to the forming stack *during* production. There is no guesswork.
- **Side Guide Adjustment Kits are now available** - Applicable to all series of Quipp Stackers from the 35X thru 50X, the installation of the External Adjustment hardware will greatly enhance the safety and operation of existing Quipp stackers.
