

Quipp ships Palletizers to Boston & Cart Loaders to Hawaii

Boston Globe Team (from left): Gary Schlender, Larry Roper, Luis Azeredo, Rocky Carnahan & Chris Hall

The Boston Globe

Quipp is starting installation of two (2) Quipp Automatic Palletizer Systems (APS) and a Bundle Distribution System with Accumulation Lanes at *The Boston Globe*, Morrissey Blvd. Plant.

The Boston Globe team of experts visited Quipp in mid February to see the equipment before it was shipped, review the schedule and confirm installation planning.

The Quipp APS has a considerably smaller footprint than most of the competition, saving valuable floor space and allowing more equipment to be placed in a limited area. Also, it requires no slip-sheets, producing major savings on materials.

The Honolulu Advertiser

Quipp has shipped the first two (2) Quipp Automatic Cart Loader Systems (ACL) to *The Honolulu Advertiser*, Honolulu, HI. Two (2) more Cart Loaders will be shipped end of April.

Quipp Automatic Cart Loaders quickly, efficiently and accurately load carts with the correct product for each remote distribution facility or carrier route.

Quipp Team (from left): Jimmy Jamil, VP Customer Service & Carlos Reyes, Project Manager

Would you like a
Quipp Golf Shirt?
See info on Page 2.

Would you like a Quipp Golf Shirt?

We will be happy to send a Quipp Golf Shirt to the first 15 customers to reply to the following question:

Which marketing material do you feel is the most useful when researching for post-press equipment?

- Brochures & Specifications Sheets
- Videos & CD's
- Web Site
- Other (identify)

Please pick only one option and e-mail your response to news@quipp.com ... and remember to mention your shirt size (M, L, XL, 2XL or 3XL).

QUIPP PACKMAN

The Quipp PACKMAN Packaging System is ideally suited to meet today's demand for even higher production rates and thicker inserted products.

Since the PACKMAN is mobile and based on existing stacker configurations, it is adaptable to most existing stacker locations. Minimum or no relocation of existing peripheral equipment is needed.

HAVING PROBLEMS WITH "FOOTBALL SHAPE" BUNDLES?
