

Quipp Tests PACKMAN Successfully in Melbourne, FL

Marcus Greco, Florida Today Packaging Center Manager (left) & Christer Sjogren, Quipp Executive VP in Melbourne, FL

The Quipp PACKMAN has been successfully tested at Florida Today, a Gannett property, in Melbourne, FL since early October of 2003. By using the PACKMAN after their Heidelberg Model 630 inserter with 22 heads, substantial labor savings were achieved over the use of conventional stacker/bottomwrapper/tyer.

Stack, wrap, print and strap in one FAST reliable operation with the Quipp PACKMAN Packaging System.

The PACKMAN design is based on Quipp Stacker & Bottomwrapper technology, developed in over 3,000 stackers and 2,000 bottomwrappers sold since 1983.

Because the PACKMAN is based entirely on familiar and proven technology, both operator and maintenance personnel will immediately be comfortable with its operation and care.

To request a VIDEO or a CD on the Quipp PACKMAN and the Quipp IN-LINE, e-mail us at news@quipp.com or call us at (305) 623-8700 ext 350

Grand Haven Tribune Grand Haven, MI

- Twin-Trak Conveyor System

TIP OF THE MONTH

Stacker Preventive Maintenance

1. Blow off the stacker with low-pressure air as part of the general area clean up. Include the infeed section, stacking section, electrical enclosure and outer surface of the stacker.
2. Visually check the infeed belting. Assure that the stacks produced are in acceptable form.

Used Equipment for Sale

Please contact factory to verify Used Stackers available for sale.
